

Metal Roofing

Overview

Metal Roofing is an excellent choice for commercial projects. The long-lasting durable material provides several benefits to both the customer and the environment. Additionally, once you install a metal roof, the maintenance is minimal since they are not susceptible to weather damage. Metal roofing is made from 95% recycled aluminum and can often be installed over an existing roof which helps reduce waste and landfill burden.

Benefits

- Proven Performance – Metal Roofs are warranted up to 50 years by the manufacturer
- Beautiful Variety of Styles – Provides upscale look for retail stores and office buildings
- Interlocking Panels Ensure Maximum Wind Resistance – Protects From Extreme weather
- Fire Resistant – Great for Factories and Warehouses that handle combustible materials
- Energy Efficient –lowers heating/cooling costs
- Environmentally Friendly – Made From up to 95% recycled material
- Lightweight – helps preserve structural integrity of the building

The average life of a non-metal roof is 17 years. But a metal roofing system offers unmatched durability, lasting 2 to 3 times longer. Most metal roofing comes with a true 30-50 year manufacturer warranty, plus a warranty from the installer. Metal roofing is a great hassle-free choice that requires little maintenance.
